How We Avoided Cutting Twice

Identify Target Audience

- Our initial target audiences:
 - African American student
 - Asian students
 - Hispanic students
 - LGBT students
 - Male students
- Our current target audience:
 - Male students

Develop and Pretest Messages:

What didn't resonate with target audiences

- “Suicide prevention” – not words that students will relate to – will walk away and not pay attention
- “Mental health” – students will also not want to read posters with this word

It's not what you want to tell them, it's what they can hear.

Develop and Pretest Messages

A real man knows when he needs help.
And is smart enough to ask for it.

Talk about it.

Big O

“I really don't like the message of being a “real man” because that implies that there are “unreal men” or men that don't measure up.”

“This is insulting to men!”
